Securing Digital Growth Across Africa

Who **We Are**

Technology has become the backbone of every modern organization. It powers operations, enables innovation, drives customer engagement, and creates new opportunities for growth. Yet as organizations become increasingly digital, they also face growing challenges - from sophisticated cyber threats and evolving regulatory requirements to complex technology investments and operational risks.

CyFort Technologies was established to help organizations navigate this changing landscape with confidence.

We are a technology advisory and cybersecurity consulting firm that partners with organizations to build secure, resilient, and future-ready digital environments. Our approach extends beyond technology implementation - we work with leadership teams to ensure technology aligns with business strategy, strengthens governance, protects critical information, and enables sustainable growth.

Whether supporting a healthcare provider protecting patient information, a financial institution strengthening cyber resilience, a humanitarian organization managing donor-funded systems, or a growing enterprise embarking on digital transformation, we provide practical, business-focused solutions that create lasting value.

At CYFORT, we believe cybersecurity is no longer just an IT function — **it is a business imperative.**

Our **Vision**

To become Africa's most trusted technology advisory and cybersecurity consulting firm, empowering organizations to innovate securely and grow with confidence.

Our **Mission**

To help organizations harness technology safely, strategically, and sustainably — delivering trusted advisory, cybersecurity, digital transformation, and governance solutions that strengthen resilience and unlock business value.

What **We Believe**

Technology should never become a source of uncertainty. Organizations should be able to embrace innovation knowing their systems, information, people, and operations are protected.

Our role is to make technology a strategic advantage -not an unmanaged risk.

Our **Approach**

Most Firms
Begin with technology

We Begin With
The Business.

Before recommending solutions, we seek to understand the organization's objectives, risks, operational environment, regulatory obligations, and long-term strategy. Only then do we design solutions that improve security, strengthen governance, optimize technology investments, and support organizational growth.

This business-first philosophy enables us to deliver practical recommendations that are aligned with executive priorities - not just technical requirements.

What **Makes CYFORT Different**

1. **Business-Led** Technology Advisory

Technology decisions should support business outcomes. Our multidisciplinary perspective bridges executive leadership, finance, operations, risk management, and technology teams.

2. **Cybersecurity** Beyond Compliance

Technology decisions should support business outcomes. Our multidisciplinary perspective bridges executive leadership, finance, operations, risk management, and technology teams.

3. **Governance** Driven

Strong governance creates stronger organizations. We integrate governance, risk management, cybersecurity, internal controls, and technology strategy into every engagement.

4. **Long-Term** Partnerships

We measure success by the long-term value we create - aiming to be trusted advisors who support organizations throughout their digital transformation journey, not deliver isolated projects.

Our **Service Portfolio**

1. Technology **Advisory**

Helping organizations make informed technology decisions aligned with business strategy.

- Technology Strategy Development
- CIO Advisory
- Technology Roadmaps
- Digital Transformation Advisory
- IT Governance
- Technology Investment Advisory

2. Cybersecurity **Consulting**

Protecting organizations against an increasingly sophisticated threat landscape.

- Cybersecurity Risk Assessments
- Vulnerability Assessments
- Security Awareness Programs
- Cybersecurity Policy Development
- Security Maturity Assessments
- Penetration Testing Coordination
- Incident Response Planning

3. Technology **Risk & Assurance**

Providing independent assurance over technology environments and digital risks.

- IT Audits
- ERP Control Reviews
- Information Systems Assurance
- Technology Risk Assessments
- Third-Party Technology Risk Reviews
- Internal Control Reviews

4. Cloud & **Digital Infrastructure**

Supporting secure adoption of modern technologies.

- Cloud Readiness Assessments
- Cloud Governance
- Secure Cloud Migration Advisory
- Microsoft 365 Security Reviews
- Identity & Access Management

5. Digital Governance **& Compliance**

Helping organizations meet regulatory and industry expectations.

- Data Protection Compliance
- Cybersecurity Governance Frameworks
- Disaster Recovery Planning
- ISO 27001 Readiness

Industries **We Serve**

- Financial Services
- NGOs & Development Partners
- Professional Services
- Government
- Logistics & Supply Chain
- Healthcare
- Manufacturing
- Education
- Retail & Distribution
- Hospitality

Our **Promise**

Every engagement is built on four commitments:

1. Understand **the Business**

We take time to understand our clients before proposing solutions.

2. Deliver **Practical Solutions**

Recommendations must be realistic, measurable, and implementable.

3. Build **Lasting Capability**

We empower organizations rather than create dependency.

4. Create **Long-Term Value**

Our focus is sustainable improvement —not short-term fixes.

LOOKING AHEAD

Securing Tomorrow's **Digital Africa**

Africa is entering a new era of digital transformation driven by cloud computing, artificial intelligence, automation, fintech, digital health, and data-driven decision-making. With these opportunities come new responsibilities.

Organizations need trusted advisors who understand not only technology, but also governance, business strategy, operational risk, and organizational resilience. CyFort Technologies exists to be that trusted partner.

> Together, we help organizations secure today, prepare for tomorrow, and build confidence in a digital future.
